PROFESSIONAL SUMMARY

Full Stack Software Engineer with 2.5 years of enterprise experience, specializing in building and scaling web applications that integrate high-performance Java and Node.js backends with modern React.js and TypeScript frontends. Delivered measurable results by modernizing a Verizon enterprise platform, achieving a 67% reduction in system latency. Highly skilled in applying a data-driven, AI-augmented development approach—leveraging tools like Cursor, GitHub Copilot, ChatGPT, and Google Gemini—to accelerate delivery velocity, optimize legacy architectures, and ensure exceptional code quality. Available for immediate start.

SKILLS & CERTIFICATIONS

Frontend: React.js (Hooks, Redux), TypeScript, JavaScript (ES6+), HTML5, CSS3
Backend: Java (OOPs, SOLID), Spring Boot, Node.js, RESTful APIs
AI-Augmented Development: GitHub Copilot, Cursor, Claude, ChatGPT, Google Gemini, Prompt Engineering
Cloud & DevOps: Docker, CI/CD, Jenkins, GitHub Actions, Git
Databases: PostgreSQL, SQL Server, MySQL
Testing & Tools: Test-Driven Development (TDD), JUnit, Jest, SonarQube, Postman, Agile, JIRA
Certificates: Google Prompting Essentials Specialization, AWS Cloud Practitioner (Expected April 2026)
Awards: Made a Difference Award (Incedo Technologies) – Awarded 3x consecutively for performance optimization and team collaboration.
Community Engagement: Active member of ReactJS Dublin.

PROJECTS

AI-Powered Test Case Automation Platform (In Progress) | Node.js, React, TypeScript, Java, Docker, OpenAI

- Architecting an autonomous API testing framework using LLMs and Dockerized CI pipelines, featuring a real-time React dashboard for coverage analytics.

AI Learning Assistant (Flash Card Application) ([Link](#)) | React, Node.js, Generative AI

- Developed a full-stack study app with complex state management, using GenAI to automate content creation and reducing manual input by 70%.

PROFESSIONAL EXPERIENCE

Freelance Full Stack Software Developer – Independent | Dublin, Ireland | Full Time | 04/24 - 09/24

- Designed responsive UI screens in Figma, leveraging AI-assisted layout tools to rapidly prototype and deliver pixel-perfect, developer-ready designs.
- Engineered full-stack features using a React.js/TypeScript frontend, Node.js middleware, and Java backend, achieving 40% faster development cycles with AI tools (Cursor, GitHub Copilot, Claude) and validating architecture patterns for production quality.
- Architected scalable API layers and data flows between the middleware and core backend, ensuring strict end-to-end type safety and robust error handling.
- Built comprehensive test suites across the UI, API, and backend endpoints, combining manual and AI-generated tests to achieve 95%+ code coverage.

Full Stack Software Engineer – Incedo Technologies Solution Ltd (Client: Verizon) | Hyderabad, India | Full Time | 08/21 – 01/24

- Optimized the core customer search dashboard for a global telecom enterprise (Verizon) using React.js and Redux, achieving a 67% reduction in latency for critical, high-volume user journeys.
- Architected the critical migration of a legacy monolithic platform to a modern Java Spring Boot microservices architecture, improving system fault tolerance and reducing developer onboarding time by 35%.
- Engineered a custom, real-time CSV data processing pipeline using Node.js and Java, replacing high-risk manual data entry workflows and reducing operational data errors by 70%.
- Automated enterprise release cycles by integrating continuous testing (JUnit) and quality gates directly into Jenkins CI/CD pipelines, successfully slashing production defects by 70% and deployment rollbacks by 20%.
- Led cross-functional Agile troubleshooting and technical documentation, resolving 90% of live production issues in real-time.

EDUCATION

MSc in Data Analytics – National College of Ireland, Dublin (Grade: 2:1) | 01/24 – 01/25

- Thesis Project:** Engineered a Python-based predictive data model for the Dublin housing market, demonstrating advanced capability in large-scale data processing, complex algorithmic logic, and data structuring.

BSc in Computer Science & Engineering – SASTRA University, India (Grade: 7.49/10) | 07/17 – 08/21

ADDITIONAL INFORMATION

Hobbies: Cooking, traveling, and gardening.
Languages: English (Fluent), Telugu (Native), Hindi, Tamil
